

# Budget Unit Brief

## FY 2017

## University of Iowa - Primary Health Care Initiative

### Purpose

The Primary Health Care Initiative funds four programs that form an essential foundation for the primary care workforce efforts of the University of Iowa Health Sciences Center. The programs are:

- The Rural Physician Support Program.
- The Iowa Health Professions Inventory.
- The Department of Family Medicine Predoctoral Teaching Program.
- The Regional Medical Education Center Grant Program.

The Initiative supports operational programs that educate and train future health professionals and helps efforts to recruit, place, retain, and track today's workforce.

### Funding

Beginning with a \$330,000 General Fund appropriation in FY 1994, state funding for the Initiative has ranged between a low of \$630,000 (FY 1995) and a high of \$917,000 (FY 2001).
